

Edit and Sovereign Edit

Office productivity without a Microsoft Office license

Policy-driven data extraction controls

Sovereign edit of any file type

The Challenge

Sensitive data has to be edited, not just stored. Today that usually means one of two things: the file travels to a cloud editing service outside your control, or a copy downloads to someone's device where you can no longer govern it or take it back. Neither option works for regulated data, and neither works when the person editing is an outside partner.

The Solution

Kiteworks gives you three editing options in one platform, from Office-compatible regular editing to full data extraction controls enforced through unified data policies. Whichever option you choose, editing happens on the server without data having to leave Kiteworks.

Three Editing Options Within the Kiteworks Environment

Choose Edit for Office productivity and collaboration, and add seats for Sovereign Edit to enforce extraction controls over Edit based on your policies. Add seats for Sovereign Edit – Streaming for policy-driven controls on editors you provide, such as CAD.

Sovereign Edit

CONTROL LAYER FOR EDIT

Adds data-extraction controls to the Kiteworks Edit sessions.

WHAT'S INCLUDED

- ✓ **Data policy controls** — extraction controls enforced through data policies
- ✓ **No copy-paste** — clipboard extraction blocked
- ✓ **No export, download or print** — data cannot leave the perimeter
- ✓ **Enforced watermarking** — applied automatically, non-removable

↑ Controls on top of Edit

Edit

FULL COLLABORATION

Fully collaborative viewing & editing for Office files, entirely inside the Kiteworks environment, without a Microsoft Office license.

WHAT'S INCLUDED

- ✓ **View & edit all Office file types** — Word, Excel, PowerPoint, PDF annotation & many more
- ✓ **Real-time multi-user co-editing** — live cursors & changes
- ✓ **Track changes & comments**
- ✓ **Multi-file editing** — many documents, each open in its own tab
- ✓ **Auto-save, versioning & full audit logging**
- ✓ **One-toggle admin** — all users, no per-seat setup
- ✓ **View-only mode** — multi-user

SOVEREIGN EDIT & CONTROL – ANY FILE TYPE

Sovereign Edit – Streaming

Streams sovereign editing in a virtual desktop to the user's browser, so any application you install runs with full functionality while its data stays secure inside Kiteworks.

WHAT'S INCLUDED

- ✓ **View & edit any file type with a desktop editor** — CAD, graphic design, true Microsoft Office & many more
- ✓ **Data policy controls** — extraction controls enforced through data policies
- ✓ **Versioning & full audit logging**
- ✓ **No export, download or print** — data cannot leave the perimeter
- ✓ **No copy-paste** — clipboard extraction blocked
- ✓ **Enforced watermarking** — applied automatically, non-removable

Editing Limits by Tier

Edit

- ⊘ Data extraction controls are not included in this tier.

Sovereign Edit – Streaming

- ⊘ One user per file at a time, with automatic lock and release
- ⊘ One folder checkout per user at a time

Use Cases: An Editor for Each Risk Level and File Type

A Shared Plan with an Outside Partner

Both sides keep and distribute the result. Kiteworks Edit lets the partner edit in the browser without holding a Microsoft Office license.

Confidential Deal Spreadsheets in an M&A Process

Bankers and advisors work on your financial model in Kiteworks Edit, which logs every session. Sovereign Edit blocks download, export, copy, and print, and enforces a watermark.

Regulated CUI Inside a CAD Model

A supply chain partner navigates and edits in real CAD software. Kiteworks Sovereign Edit – Streaming gives them no way to download or copy the data.

Outside Counsel Redlining a Contract

The firm requires genuine Microsoft Word. Sovereign Edit – Streaming runs it in your environment and streams only the screen image, so counsel redlines without possessing the file.

Ask your Kiteworks representative for an Edit and Sovereign Edit walkthrough.

Kiteworks

Kiteworks' mission is to empower organizations to effectively manage risk in every send, share, receive, and use of private data. The Kiteworks platform provides customers with a secure data exchange that delivers data governance, compliance, and protection in a unified control plane. Kiteworks unifies, tracks, controls, and secures sensitive data moving within, into, and out of their organization, significantly improving risk management and ensuring regulatory compliance on all private data exchanges. Headquartered in Silicon Valley, Kiteworks protects over 100 million end-users and thousands of global enterprises and government agencies.
