

# Upgrade Your Managed File Transfer Investment With Accellion

## ENTERPRISE CONTENT FIREWALL

### Prevent Sensitive Data Breaches and Block Malicious Attacks

Prevent breaches and compliance violations when you share confidential information with partners, customers and other third parties. With the Accellion enterprise content firewall, you have the secure file sharing capabilities legacy managed file transfer (MFT) provides and so much more. CIOs and CISOs rely on Accellion for complete visibility, compliance and control over the communication of IP, PII, PHI, and other sensitive content across all third-party communication channels, including email, file sharing, mobile, enterprise apps, web portals, SFTP, FTPS, and automated inter-business workflows.

### See and Control All Content Entering and Leaving the Organization

Improve data governance with visibility to all content entering and leaving your organization, and demonstrate compliance with one-click compliance reports. Get a global view with the CISO Dashboard, drill down to individual file transfers, and generate detailed compliance reports that provide proof that you have full visibility and control over the exchange of sensitive enterprise information.

- Real-time and historical view of all inbound and outbound file movement
- All files from all connected systems, whether on-prem or cloud
- All activity: who's sending what to whom, when and where
- Spot anomalies in volume, location, domain, user, source, and scan results

SFTP, MFT, Visual Orchestration, REST API, Enterprise Apps, Web Forms, Collaboration, Email, File Sharing, Mobile

## Automate Routine Workflows and File Transfers

Save time, reduce errors and strengthen compliance with a robust enterprise workflow automation toolkit. The Accellion content firewall provides four flexible approaches to automate routine workflows for sending, receiving and distributing enterprise content, including SFTP, visual orchestration, a secure mail gateway and a powerful REST API.

- Securely transfer confidential financial information
- Reduce errors from manual processes
- Visually orchestrate code-free file transfer flows to connected on-premise and cloud repositories
- Create content-enabled apps and integrations using a flexible REST API
- Reduce admin costs by consolidating SFTP servers

## Modernize SFTP to Reduce Administrative Costs

Share sensitive information with a policy-driven, self-service SFTP server to improve security, compliance and responsiveness. The Accellion content firewall provides an SFTP server interface alongside its Web, mobile, and API interfaces, controlled by the same centralized IT policies. Share from Web folders with the same level of compliance and control.

- Centralize policy-based management
- Speed responsiveness with governed self service
- Reuse existing scripts
- Scale out servers
- Audit and monitor with rich logs and reports

## Legacy MFT and Accellion: A Side-By-Side Comparison

Use Case	CyberArk IBV	Accellion	Features
Encryption	Supported	Supported	TLS 1.2 / AES-256; encryption key ownership
Security Integrations	Partially Supported	Supported	SSO, HSM, LDAP/AD, DLP, ATP, SIEM, MDM, MFA/2FA
Deployment Flexibility	On-premise installer only	Supported	Hardened virtual appliance on-premise, private cloud, hybrid cloud, FedRAMP
File Activity Visibility	Partially Supported	Supported	Inbound and outbound content, file uploads and downloads; machine learning-powered alerts
Automated File Sharing	Partially Supported	Supported	Multiple options: SFTP, MFT, or REST API Connects to: SMB File Shares, SFTP, FTPS, S3, local files and more
Large File Transfer	Not Supported	Supported	16 Terabyte max file size
Secure Email	Not Supported	Supported	Password protected emails and secure email attachments with enterprise grade encryption from any location or device
Plugins and Applications	Not Supported	Supported	Microsoft Outlook, Office 365, Word, Excel, PowerPoint, Google Drive/Docs/Sheets/Slides, SFDC, iManage, SharePoint
Mobile	Not Supported	Supported	iOS and Android; encryption, secure folders, app whitelisting, remote wipe, consumer-grade ease of use

CISOs and CIOs at more than 2,500 of the world's leading enterprises and government agencies trust Accellion
