

# The Kiteworks iManage Plugin for Legal Firms

Transforming File and Email Security and Compliance for the Legal Sector

In the legal arena where document confidentiality and compliance are paramount, Kiteworks and iManage unite to offer a revolutionary solution for law firms. This powerful integration not only fortifies the security of sensitive information but also amplifies the efficiency of external collaboration. Legal professionals can now navigate the complexities of file sharing and data governance with unrivaled ease, ensuring that client trust and regulatory adherence are never compromised.

## External Sharing With Internal Assurance

Legal firms can now extend their reach beyond the firewall without exposing their iManage Document Management System (DMS) to risk. With Kiteworks, send sensitive email attachments and bodies with the assurance that your iManage DMS remains untouched and secure. This external sharing is managed with the same enterprise-grade security and governance that legal professionals demand, allowing for clean-room collaboration in secure shared folders.

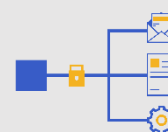

## Productivity Meets Protection

Embrace a system where productivity and protection go hand in hand. Kiteworks integrates directly into iManage's familiar menus, providing secure options that legal staff can utilize without deviating from their established workflows. The seamless nature of this integration means evidence files of unlimited size can be sent and shared, and the results of external collaborations are effortlessly applied to DMS versions, all while maintaining strict compliance with evidence and privacy regulations.

## Administrative Control and Compliance

Legal firms set granular, scalable administrative policies, exerting control over access with precision. Enterprise-grade encryption protects data during transit and rests securely within the DMS. Kiteworks' comprehensive audit logging, bolstered by SIEM support, prepares firms for rigorous audits, ensuring that all actions are recorded and compliant with the stringent demands of legal data governance.

### Feature Highlights

**Simple External Email & File Sharing**

**Secure by Default**

**Never Exposes DMS**
