

TOP 5 REASONS FOR KITeworks UNDER 10 CFR

How Kiteworks Turns 10 CFR Cybersecurity And Supply-Chain Requirements Into Audit-Ready Evidence, Not Just Documented Policy.

Part 73.54

Part 73.77

Part 21

Part 53

Top 5 Reasons For Kiteworks

1

EVIDENCE

Prove Part 73.54 Compliance — Don't Just Document It

The Data Policy Engine logs every access action to one exportable audit record — turning "high assurance" into evidence you can produce on demand.

2

SUPPLY CHAIN

Close the Part 21 Supply-Chain Gap

MFT Server governs supplier and vendor exchanges with vault-to-vault transfer and a full audit trail — defect reports rest on traceable data, not an email attachment.

3

NOTIFICATION

Cut Time-to-Evidence When the Part 73.77 Clock Starts

A unified, exportable audit trail cuts the time to assemble a defensible record of what happened and when — the deciding factor under a fixed notification deadline.

4

GOVERNANCE

Govern Every Actor Under One Policy — People, Machines, and Systems

One policy engine governs every actor, including AI agents via Kiteworks' MCP Server, so Part 53's technology-inclusive automation is covered from day one.

5

READINESS

Build the Evidence Architecture In — Not Bolt It On Later

FedRAMP High In Process, FedRAMP Moderate Authorized since 2017, built-in CMMC 2.0 reporting, and high-availability clustering with no single point of failure — ready whether you're renewing under Part 50/52 or building fresh under Part 53.

Kiteworks

Kiteworks' mission is to empower organizations to effectively manage risk in every send, share, receive, and use of private data. The Kiteworks platform provides customers with a secure data exchange that delivers data governance, compliance, and protection in a unified control plane. Kiteworks unifies, tracks, controls, and secures sensitive data moving within, into, and out of their organization, significantly improving risk management and ensuring regulatory compliance on all private data exchanges. Headquartered in Silicon Valley, Kiteworks protects over 100 million end-users and thousands of global enterprises and government agencies.
