How Kiteworks **Enables** Third-party Risk Management

The Kiteworks Private Content Network (PCN) consolidates and secures all third-party communication channels, including email, SFTP, file sharing and collaboration, managed file transfer, and web forms

Employs real-time monitoring to analyze sensitive content entering and leaving an organization

Allows organizations to set granular, scalable attribution-based content controls while using enterprise-grade encryption in transit and at rest

Integrates with existing advanced security infrastructure, including DLP, ATP, SIEM, CDR, and others

Uses single-tenant hosting, including FedRAMP deployment options, for regulatory compliance and complete control over server environment
